Tuesday - Friday.....10:00 a.m. – 12:00 p.m.  
..... 1:00 p.m. – 5:30 p.m.

We are located 9 minutes [4 miles] north of the intersection of US 30 and Tower Road[AKA N250W]

## Background

Since April 2004, we have quilted over 9,000 quilts, first in our location in Bluffton OH and now in our longarm studio in Valparaiso IN. Forever In Stitches is a place where you can peruse “Raggedy” Ruth’s designs and ask questions. We feel we have achieved our dreams. We trust that we’ll help you achieve your dreams, too.

Our shop is well known as the home of **Raggedy Ruth Designs™** studio. A simple walk in the door will present you with displays of many of her sample quilts. Come by and take a look!

The view is spectacular with some 15 of Ruth’s one-of-a-kind designs hanging on the walls!

Ruth has created over 160 patterns, three books and two tools. The patterns are sold individually, or as Block Of the Month and Shop Hop programs.

Ruth’s patterns and books are unique, well-illustrated, and understandable, often with quilt finishing instructions for multiple quilt sizes.

Her designs can be seen and perused in our shop or on our on-line at our [web-store](#). They are nationally sold through other quilt shops and distributors. More information can be obtained from our web-site at [www.ForeverInStitches.com](http://www.ForeverInStitches.com).

Ruth also invented the **Perfect Corner Ruler™** and **Perfect Corner Method™**. These are used to piece accurate 90° corner triangles while saving fabric.

It was designed to be substituted for the old “sew and flip” technique so that special patterns do not need to be purchased.

This ruler is different because it has no seam allowances, the measurements start from zero at the corners, and there is a column that eliminates any need for mathematics.

This technique overcomes the inaccuracies and waste of **all** other techniques. This approach works for all block shapes and configurations including snowballs, square in a square, flying geese, triangle on a triangle, star points, and more.

It created blocks of the proper size so that:

1. Points of stars and blocks are not cut off;
2. Lines and designs are correct as the patterns intended;
3. Less fabric is used in creating the blocks as one corner square creates two corner triangles.

More information can be obtained on our web-site at the [Perfect Corner Ruler™](#) tab at [www.ForeverInStitches.com](http://www.ForeverInStitches.com) or from our helpful quilting professionals in the shop.

## Award-Winning Services

We quilt 600 customer quilts per year - and we’ve been doing that since 2004. The quilting required by our clientele ranges from basting to edge to edge [E2E] to highly custom quilting. Our clientele ranges from individual quilters to quilt shops to custom interior decorators and upholsterers.

We have two Innova 26” AutoPilot Mach3™ machines with GFE [Grand Format Embroidery]. We can quilt items up to 12 feet wide and over 15 yards long or as small as you desire. We can satisfy your quilting needs from a small candle mat to a California king bedspread or home decorator items.

We have the ability to provide the maximum flexibility for your quilting needs. Our automated stitching excels at intricate designs, and allows you to choose the designs and the layout of your quilt to accent your quilt top.

We have 5,000 patterns ready for your quilt, 1,600 of which were created by us. We can also create additional patterns in-house as needed or we can obtain designs from other designers for you, as required.

When combined with our large choice of over six dozen colors of thread plus invisible monofilament, we can achieve many different effects, including incredible stitching that does not detract from your quilt, while at the same time, adding another dimension of beauty.

Call us to schedule an appointment with our qualified personnel to review and check-in your quilting project. Also, call or go to our web-site to receive our [Longarm Brochure](#) that explains the pricing and process in detail.

## DIY Longarming

In 2020 we added DIY Longarming™ so that you can longarm your quilts under the supervision of Ruth Grihalva, Master Quilter and author of two self-study courses on the use of the Innova. She has also been the instructor for the advanced Innova class given by Accomplish Quilting. Give us a call!

## We Are Your Innova Dealer

We are proud to be an [Innova dealer](#) for the entire line of products. Innova is "Built To Quilt" from the smallest detail of design to the end result of your quilting.

The scalable Innova designs mean that you can start small and grow with your capabilities and needs using your original equipment! Each size of mid- to long-arm sew-head [18", 22", 26", 32"], can be upgraded from free-motion to AutoPilot Mach3™ and all points in between. Your only up-front decision is the size of the sew-head, which determines the size of the patterns and designs that you can sew.

The next steps are Lightning Stitch™, Pantovision™, Navigator™, AutoPilot Mach3™ and Grand Format Embroidery [GFE] width couching and sequins along the way - any step from free motion, to full automation enhanced longarming.

The same scalability is true of the tables, to a slightly lesser extent. Tables can be changed from 5' to 22' by only changing a few items such as the rollers.

So, whether you are a hobbyist, a professional, or operate a longarming service, you can find an Innova to fit your needs from the 18" free-motion at \$10,000 to a 32" AutoPilot Mach 3™ with GFE for \$38,000. That is a big range in prices, but an even greater range in capabilities and capacity.

Suffice it to say that matching your desires with the capabilities of the machines, while taking into account any changes in your desires as you progress, is what is important. We can assist you through the choices to fit your needs when you call us.

## Thread

We have over six dozen colors of thread for your longarming.

## Extra-Wide Backing Fabric

We carry various plain wide backings of 118" in width. This allows you to avoid having seams in the backs that can distort your quilt and can cause unintended consequences during the longarming process. They also allow you to "show off" your longarming.

## Batting

We carry high quality batting from Quilter's Dream Company. We chose their batting because of its unsurpassed quality and uniformity. Batting is available in numerous thicknesses of polyester and cotton.

We keep two thicknesses of polyester

batting in stock at all times. However, additional sizes, thicknesses, colors, and fibers can be obtained within a week from the factory.

## Patterns, Books & Tools

Books and patterns are "Idea Central" for quilting. Come, browse this constantly updated area.

[Raggedy Ruth Designs](#)™ has over 160 patterns, three books, and two tools for your quilting desires and endeavors.

## Our Web-Site & Facebook

Visit us at [www.ForeverInStitches.com](http://www.ForeverInStitches.com). Our site is updated at least weekly. It has a page that has links to all of our [newsletters](#). It also has instructions on submitting your quilt top in person or by mail. We also have an up-to-date [Facebook](#) page.

In our [web-store](#) you can peruse our patterns, or purchase our products.

## Digitized Stitching Designs

While meeting our customers' needs, requests from other longarmers, as well as our own artistic needs, we have developed over 1,600 digitized stitching designs. As long as a quilting machine is automated our designs will most likely work for you. A list of supported formats can be found on our [web-site](#).

Designs are sold in groups to lower their cost to you. Pictures of the designs can be found on our [web-site](#) in html format.

Subject to change without notice.
